SUMMARY

Senior Oracle DBA with about five years of hands-on work, mostly on Oracle Database, alongside SQL Server and some PostgreSQL. I am currently the Senior Database Administration Supervisor at Sepanta Behshahr Industrial Co, where most of my time goes into Oracle E-Business Suite: patching, cloning the database and application tiers, keeping backups in good shape and tuning whatever slows the users down. I installed and configured Oracle Access Management (OAM) myself, so EBS users now sign in with single sign-on, including straight from their Windows login, and I installed Oracle Cloud Control 24ai for monitoring. I also work with SQL Server and T-SQL, and build internal applications with Oracle APEX. Right now I am learning data engineering, which I want to grow into.

WORK EXPERIENCE

Senior Database Administration Supervisor (Senior Oracle DBA)

Dec 2025 - Present
Sepanta Behshahr Industrial Co (FMCG manufacturer), Tehran, Iran

- Installed and configured Oracle Access Management (OAM) myself, from the first install to go-live: single sign-on for Oracle E-Business Suite, including sign-in from the Windows desktop login
- Oracle E-Business Suite administration: patching and cloning of both the database tier and the apps tier
- Oracle Database 11g, 12c and 19c on Oracle Linux 7 and 8: installation, upgrades and patches, RMAN backup and restore, Data Pump, Active Data Guard, ASM, partitioning and performance tuning
- Installed Oracle Cloud Control 24ai and use it for day-to-day database monitoring
- Built a daily email report on RMAN backup status, tablespace usage and Data Guard lag
- SQL Server administration and T-SQL on Windows Server and IIS; installed RedGate SQL Monitor and SolarWinds DPA for SQL Server monitoring
- Building internal applications with Oracle APEX
- Administering the company's ticketing system, ManageEngine ServiceDesk Plus

Oracle DBA

Mar 2022 - Nov 2025
Barid Samaneh Novin, Tehran, Iran

- Installed and configured Oracle Database 11g and 19c
- Ran Oracle Active Data Guard with several standby databases for disaster recovery
- RMAN backup and restore, Data Pump exports and imports
- ASM and Grid Infrastructure administration, table partitioning and performance tuning
- Installed, upgraded and patched Oracle Linux 8 servers and applied database patches
- Database monitoring with Oracle Cloud Control 24ai

Software Deployment and Support Specialist

May 2021 - Mar 2022
Barid Samaneh Novin, Tehran, Iran

- Installed and supported application and database servers for the company's office-automation software
- First hands-on work installing and maintaining Oracle Database and setting up RMAN backups

SKILLS

Oracle Database

Oracle Database 11g, 12c, 19c on Oracle Linux 7 and 8, RMAN Backup and Recovery, Data Pump, Active Data Guard, ASM / Grid Infrastructure, Partitioning, Performance Tuning, Patching and Upgrades, Database Cloning, PL/SQL, RAC, GoldenGate

Oracle Applications and Middleware

Oracle Access Management (OAM) and SSO, Oracle E-Business Suite (administration, patching, cloning), Oracle APEX, Oracle Cloud Control 24ai, Oracle WebLogic Server (basic)

SQL Server and Other Databases

Microsoft SQL Server Administration, T-SQL, Windows Server, IIS, monitoring with RedGate SQL Monitor and SolarWinds DPA, PostgreSQL (basic)

Other

VMware ESXi, SSRS (basic), ManageEngine ServiceDesk Plus, Microsoft Dynamics

EDUCATION

B.Sc. in Computer Engineering (2017 - 2022)

Islamic Azad University, Tehran North Branch

LANGUAGES

English (Upper Intermediate) | Persian (Native)
